## Review questions

### Question 1

1/1 point (graded)

Select the enrichments that are available after uploading data.

☒ General Sentiment

☒ Top Entities

☒ Content Hierarchy

☐ Word Count

Submit

You have used 2 of 2 attempts

### Question 2

1/1 point (graded)

In this lab, Discovery found the top entities as Chicago, NYC, and San Francisco, which was expected. However, it also found Union Square. Why is that?

☐ Because there is a Union Square in New York

☐ Because you added that location as an option in Assistant when you built the chatbot

☒ Because hotel guests probably liked certain hotels because of how close they were to Union Square ✓

☐ Because San Francisco is geographically close to Union Square

Submit

You have used 2 of 2 attempts

---

### Question 3

1/1 point (graded)

Discovery cannot analyze whether there are statements of negative or positive valence in a document. You need another service to do that.

☐ True

☒ False ✓

Submit

You have used 1 of 1 attempt

---

### Question 4

1/1 point (graded)

In Discovery sentiment analysis, what does an average score of .43 mean?

☒ There are slightly more negative reviews than positive. ✓

☐ Negative and positive reviews are equal.

☐ No positive reviews were found.

☐ There are slightly more positive reviews than negative.

Submit

You have used 2 of 2 attempts

---

## Question 5

0/1 point (graded)

Indexing is the first step in the data enrichment process.

☒ True ✗

☐ False

Submit
